linkedin.com/in/garciafelipe1 | github.com/garciafelipe1

PROFESSIONAL SUMMARY

Product-oriented Full Stack Developer experienced in building production-ready web applications and scalable backend systems. Strong background in React, Next.js, Node.js, and Django, with hands-on experience designing secure REST APIs, authentication systems, and containerized deployments. Focused on clean architecture, performance, and delivering reliable digital products in collaborative environments.

EXPERIENCE

Full Stack Developer — Contractor, [Las Flores de la Imprenta](#)

Bahia Blanca, Argentina | June 2025 – Feb 2026

- Led the end-to-end development of a production ecommerce platform using Next.js, React, and Medusa.js.
- Designed and implemented a complete purchase flow including catalog management, product filtering, shopping cart, and multi-step checkout integrated with Mercado Pago.
- Developed REST APIs and business logic for order management and subscriptions.
- Implemented Google OAuth authentication and customer account system.
- Integrated analytics and performance tracking (Google Analytics 4, Meta Pixel, Google Ads).
- Containerized backend services using Docker and deployed to cloud environments (Vercel, Railway).
- Implemented internationalization (i18n) and SEO-friendly routing strategies to improve global accessibility.

EDUCATION

University Technical Degree in Programming — Universidad Tecnológica Nacional

Bahía Blanca, Argentina | Feb 2022 – Mar 2025

Frontend Development with React - Universidad Tecnológica Nacional

Buenos Aires, Argentina | Feb 2023 – Feb 2024

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL

Frontend: React, Next.js, Redux, Tailwind CSS

Backend: Node.js (Express), Django, Flask, Spring Boot, RESTful API development

DevOps & Cloud: Docker, cloud deployments (Vercel, Railway), environment configuration

Tools & Practices: Git, Agile methodologies, scalable architecture design

PROJECTS

Blog Platform — Full Stack Web Application (Django + Next.js)

- Designed and developed a full-stack blog platform with role-based authentication, user profiles, and analytics features.
- Implemented secure JWT authentication with 2FA (OTP + QR), role-based access control, and brute-force protection.
- Built RESTful APIs using Django, PostgreSQL, and Redis, including asynchronous processing with Celery and real-time features via WebSockets (Channels).
- Developed a responsive frontend with Next.js, Redux, and Tailwind CSS.
- Containerized the application using Docker Compose (backend, PostgreSQL, Redis, workers).

Technologies: Django, DRF, PostgreSQL, Redis, Celery, Channels, Next.js, React, Redux, Tailwind, Docker

Tech Social — Developer Social Network Platform

- Designed and developed a full-featured social platform including user profiles, posts, follow system, notifications, and real-time messaging.
- Developed REST APIs and optimized database queries to improve performance and scalability.

Independent Full Stack Developer – FG Software Agency

- Founded and managed a boutique web development studio delivering custom web solutions.
- Built scalable ecommerce and business platforms from UX design to deployment.
- Worked directly with clients to gather requirements and translate them into technical solutions.

Technologies: Python, Django, React, Redux, Tailwind CSS
